

Sidewinder 27

Mechanical Sweeper

For quick retrieval of trash and litter, the Sidewinder 27 is ideal for indoor or outdoor use, in damp or dry conditions.

- The 27-inch sweeping path makes quick work of hard surface clean-up jobs—five times faster than push brooms.
- The removable hopper makes emptying the machine quick and easy.
- The 12-inch (30.5 cm) side broom assures dirt along walls and curbs is picked up by the main brush.
- The pressure adjustment knobs, one for the side broom and another for the main broom, allow the operator to keep the Sidewinder 27 working at the proper brush height.
- Lightweight and maneuverable, the Sidewinder 27 is a natural for shopping malls, movie theatres, supermarkets, warehouses, and parking lots, where litter removal is necessary.

		-Caster		Warranty	1 year limited
Dust Control	Rubber seals	Switches & Controls	Separate brush height adjustment for each broom		

Productivity — The Sidewinder 27 will cover 31,000 sq. ft. (2,883 sq. m.) per hour.

The 12-gallon (40 liter) hopper can be easily lifted out and emptied.

The side broom can be tipped back during transport and when not needed.

The main brush pressure can be adjusted by turning the knob at the rear of the sweeper. The sidebroom has separate adjustment.

① The rugged injection-molded polyethylene body and hopper stands up to years of use.

④ The side broom sweeps the dirt and debris away from walls and curbs into the pick-up path of the brushes.

② Large wheels provide excellent traction both indoors and out. With a single front caster, the Sidewinder 27 is extremely maneuverable.

③ Tough pulley belt, activated by the movement of the wheels, powers the side brush for edge work.
